Yes the environments are beautifully crafted and the sound is top-quality, but you cannot move/explore, and there's very limited interactivity (it's an 'experience', but nobody said a VR experience should be mostly looking around and doing close to nothing). And worst of all, there's almost no story. To be honest, it feels like a (talented) developer (or team) made a nice proof of concept, but then didn't have the motivation (or resources) to turn it into a full game, so it was released as "an experience" and sold for a high price. I can't recommend buying this unless the current price (of 20 EUR) drops.. This is the scariest VR game i've ever played. Me and my friend Casper just tried it, and we almost scare-quit the first time. I REALLY recommend this game if you want to get REALLY scared! + The graphics are 10 / 10.. So I'm not the type of person to get easily scared and I won't be having any nightmares after playing this game or anything. But what this game did do is increase my heart rate and build suspense. The VR scenarios this dev created are simply beautifully breath-taking and amazing in creating a sense of dread. Whether it's a crow slowly flying and landing near you or a gate opening or a sound in the distance, you slowly start to feel alone and powerless to stop whatever evil force is coming. The abandoned cabin you are in, suddenly starts to feel too small. It is true that there isn't much of a game here or a story. However, it's the experience that this dev brings which brings entertainment value. I honestly can't wait to share this experience with my friends and family and see their reactions. Jump scares may be cheap, but it's the buildup with all the little details along the way that make it work in this game versus other games from other devs. Just notice the mushrooms in the grounds, the details of the trees and the ambient sounds. Everything was detailed to bring the maximum horror to such a simple concept. Sale Price Rating 7/10 Definitely a must buy for horror fans for \$6.79 is a good deal for the content, at normal price of \$19.99 I would only give a tepid recommendation. If you like jump scares, and all you want is jump scares, this is the game for you. Though it seems to be the same one over and over. Otherwise, this should be called Mummy Simulator 2017 because 30 minutes in all I'm doing in every scene is holding my arms straight out and rotating my torso back and forth. 30 minutes of that. No change. Jump scare, mummy position, jump scare, mummy position.. Ami vreau bani anapoi golanilor ka ami trebuie viar shi eu nam dalea ca e scupe golani dracului ce suntetzi, voi nu stitzi kum e sha traieshti an romania ka aiki nai bani de o paine shi un pateu ka al dai pe tzigari shi voit vretzi sami iau viar? sami datzi bani anapoi, SA VINA DOMNUL IOHANNIS! va pwp, astept banii inapoi ba.. 4/10 What a dull game. You stand in one place and looka round you with a camera on nightvision while noises create a spooky atmosphere. At times you see something out of the corner of your eye, but most of the time you just stand there wishing someone had included something more interactive. On the plus side, the scenery is nice, and it is quite tense.. Holy chit! What an awesome experience! I played it for an hour straight, not reading much about it at all. I played it too long actually, but it really felt like a nightmare. The in game clues led me to understand the strange loop I was stuck in. The only way to wake up is to look out! So yeah, you may want to wait for a sale to bite on this one, but it is a high quality product, and I strongly recomend.. I bought this on sale at a hefty 90% discount. I lasted about five minutes before deciding it was a little bit \*too\* creepy for the time and place I first played it. I, therefore, am not qualified to give a full review, but It's definitely worth a punt for u00a30.71. It's \*really\* creepy. From my limited time in the game (so far) I can say that it has fully customisable rendering options and fluid controls.. You kinda just stand there for 20 minutes, with not really anything going on. it's got decent graphics, directional audio, but more story content or a little narration would be nice. Get DreadHalls instead. More fun and wayyy scarier IMHO.. I just got this on sale and I'm really happy with what I got. Yes, it is more of an experience than a traditional game, but this experience is actually nicely designed, well made, and randomized so there's quite some replay value.
